DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 226, 29, 32, 35-45, 48, 51-52, 55, -56, 59-65 and 73 drawn to a fuel composition comprising a (a) fuel hydrocarbon and nonlinear primary alcohols having

at least 11 carbon atoms, method of biodegrading said fuel, a method use of said fuel and a method for transporting said fuel.

Group II, claim(s) 18, 27, 30, 33, 46, 49, 53 and 57, drawn to a fuel composition comprising a (a) fuel hydrocarbon and nonlinear primary aliphatic Oxo alcohols produced by process comprising process I, II and III, method of biodegrading said fuel, a method use of said fuel and a method for transporting said fuel.

Group III, claim(s) 19-25, 28, 31, 34, 47, 50, 54 and 58 drawn to a fuel composition comprising a (a) fuel hydrocarbon and nonlinear primary aliphatic Oxo alcohols produced by a process having process steps I and II, method of biodegrading said fuel, a method use of said fuel and a method for transporting said fuel.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

Art Unit: 1714

corresponding special technical features for the following reasons: Claims 1, 18 and 19 each discloses a fuel composition comprising an alcohol that is obvious or anticipated by WO 97/38956 or U.S. 5,449,960 or WO 97/01521. Accordingly, the special technical feature linking the three inventions, a hydrocarbon fuel, does not provide a contribution over the prior art, and no single general inventive concept exists. The alcohols are not the same because the alcohol of Group I can be produced by any process, the alcohol of Group II is required to be produced by a specific three steps process and the alcohol of Group III is required to be produced by a specific two step process. Therefore, the restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
